MOTIF

Ganapatipule Mandir

Ganapatipule is a very small town, having one of the most spectacular beaches along the Konkan Coast. About 400 years old Ganpati image at Ganpatipule is said to have sprung up from the soil. This deity faces the West, so as to guard the western gates, unlike deities in other Indian temples who face the east. The temple is at the base of a hill, and pilgrims walk around (pradakshina) the hill as a mark of respect.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non-Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non-Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added

amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centres (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns,(ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Ranjit Singh Deol, Director of Census Operations, Maharashtra. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl. RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

PREFACE

The emphasis on decentralised planning is progressively gaining momentum in India in view of the enactment of Panchayat Raj Institutions at grass-root level. This Handbook provides necessary information required for planning and decision making at the micro level in the context of decentralized planning at District and block level.

In fact, Census has voluminous database systematically organised, updated and structured so that it is of some value and generates valuable information for development. For the best utilisation of such extensive data, the Census Organisation is publishing such primary census data, integrated with other non-census data from secondary sources with village level information and maps as a handbook for each District. The Registrar General and Census Commissioner in his foreword has already provided sufficient details of history and scope of the publication of District Census Handbook.

The design for the 2011 District Census Handbook was evolved centrally by the Census Commissioner, India. In accomplishing this task we have received whole-hearted co-operation of the staff at various levels of different departments of the Government of Maharashtra. Much of the data so provided by this field level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepancies as well through the software provided by the Registrar General and Census Commissioner, India.

I am deeply grateful to Dr.C.Chandramouli, Registrar General & Census Commissioner, India and Shri Deepak Rastogi, Additional Registrar General for their guidance in bringing out this publication. I also express my thanks to Shri A.P.Singh, Deputy Registrar General (Map), Shri A.K.Singh, Deputy Registrar General (Census Division), Dr.Pratibha Kumari, Assistant Registrar General (SS Division), Shri M.S.Thapa, Addl. Director (EDP) and their colleagues for providing technical guidance in finalising this volume.

In this Directorate the DCHB section was spearheaded by Shri Y.S.Patil, Deputy Director under the guidance of Dr. S.S.Hiremath, Joint Director. He was ably assisted by Shri D. B.Gode, Assistant Director, Shri W.A.D'Souza, Statistical Investigator Gr.I and Smt. Winifred A. D'Souza, Statistical Investigator Gr. I.

The physical features have been concurred by the Map section, after incorporating necessary updates, wherever required. The maps inserted are prepared by the Cartography Section under the guidance of Shri D.N. Chaurasia, R.O(Map). I am thankful to the Census Section headed by Smt. B.H. Thakare, Assistant Director, PCA/DDU unit headed by Shri Santosh Payas, Assistant Director and DDE section headed by Shri Vijay Ahire, Deputy Director.

Lastly, I take this opportunity to offer my thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given in the "Acknowledgements".

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to District level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each District. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the District. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the District, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, District census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to Tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

Ratnagiri District forms a part of the greater tract known as the 'Konkan'. This tract is historically famous for its long coast line and convenient harbours, together with its comparative nearness to the Arabian Coast. For the administrative convenience and industrial and agricultural development, Ratnagiri District was divided into Ratnagiri and Sindhudurg with effect from 1st May 1981.

The word 'Konkan' is of Indian origin and of considerable antiquity, though the origin of the name has never been sufficiently explained. The seven kingdoms of the Konkan of Hindu mythology are mentioned in the 'Hindu History of Kashmir' and are said to have included nearly the whole west coast of India. The Pandavas are said to have passed through this region in the 13th year of their exile and had settled in this area for some time. The Raja of this region Veerat Ray had accompanied them in the famous war at Kurukshetra with the Kauravas. In Ratnagiri District, there are caves at Chiplun, Khed, Dabhol, Sangameshwar, Gavhani-Velgaum and Vade padel.

In the 2nd Century A.D., the great empire of Mauryas annexed the entire Konkan coast. In the middle of the Sixth Century, Kings of the Maurya and Nala dynasties appear to have been ruling in the Konkan. The District of Ratnagiri was under the Silaharas and the capital of their kingdom was probably Goa and later it may have been transferred to a more central place in the vicinity of Ratnagiri or Kharepatan. Chandrapur was one of the most ancient Towns in Konkan, probably founded by Chandraditya, a son of the Chalukya King Pulakeshi II.

The Portuguese power slowly declined and with the rise of Shivaji, the hold of Sultans on the District was lost by 1675 and the District passed finally into the hands of Marathas. Marathas continued to rule the District till 1817 i.e., when the struggle between the British and the Peshvas came to an end and the whole of Konkan was transferred to the British.

In 1819, South Konkan was formed as a separate District. Its headquarters was first at Bankot and later at Ratnagiri. Three northern sub-divisions were transferred to Thane District in 1830 and the District was reduced to a sub-collectorate level under Thane District. In 1833, it was again made a full-fledged District and named as Ratnagiri District.

In 1891, the District had the following sub-divisions, Devgad, Ratnagiri, Sangameshwar, Vengurla, Malwan, Rajapur, Chiplun, Khed, Dapoli talukas and Guhagar and Mandangad petas. There were no major changes between 1891 and 1931. In 1945 Kankavli and in 1949, from Sawantwadi Kudal and Lanja new mahals were formed. With the reorganization of the States in 1956, the District was included in the Bombay State. Since 1960, it forms a part of Maharashtra.

At the time of 1961 Census, the District comprised of 11 talukas and 4 mahals included 1,516 inhabited villages covering 13 Towns. During the decade of 1961-71, the mahals were upgraded as talukas; thus raising the number of talukas to 15. In 1971, the District had 15 Tahsils comprising of 1,519 villages (including 5 uninhabited) and 15 Towns. With the upgrading of hamlets and wadis in the District, the total number of villages has gone up to 2,043 (including 5 uninhabited) in 1981. Kankavli census Town was created in 1981. Due to declassification, the number of Towns has gone down from 15 in 1971 to 13 in 1981. After the 1981 census, the District has been divided into two Districts as Ratnagiri and Sindhudurg. In 1991, Ratnagiri District had 9 Tahsils and 8 Towns with 4 uninhabited villages and 1,515 inhabited villages. During 2001 Census, number of Tahsils is same as in 1991, but 3 Census Towns declassified, 5 villages received the status of census Towns and 26 new villages had been created after 1991 Census. In 2011 census, the District has 9 Tahsils, 16 Towns and 1537 villages (including 6 uninhabited villages).

ANALYTICAL NOTE

Physical features

Location and Size

Ratnagiri District lies along the west coast forming a part of traditional 'Konkan Land' between 16° 13' to 18° 04' North Latitudes and 73° 02' to 73° 52' East Longitudes. The District is bounded by Raigarh District in the north, Arabian Sea towards the west, Sindhudurg District on the south and Satara, Sangli and Kolhapur Districts to the east.

The District has an area of 8,208 sq.kms., and a population of 16,15,069 persons as per Census 2011. While the area of the District accounts for 2.67 percent of the total area of the State, the District population constitutes 1.44 percent of the total population of the State. The density of population is 197 persons per sq. km. Among the 35 Districts of the State, the District ranks 18th in terms of area, 28th in terms of population and 32nd in terms of density.

The headquarters of the District is at Ratnagiri, a Town having population of 76,229 persons, which is located at 370 kms., from the State capital of Maharashtra, Mumbai. It is well connected from Mumbai and Kanyakumari by Konkan Railway. District also has a good network of roads which connects it from the other parts of the country.

Physiography

India has been divided into four macro level physical divisions. These are The Northern Mountains, The Great Plains, The Deccan Plateau and the Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1) The Deccan Plateau and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine Districts of the State while only six Districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands are divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the State of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below:

(A) Deccan Plateau:

(i) Northern Maharashtra:

- (a) Tapi-Purna Valley: Includes the Districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.
- (b) Wardha-Penganga-Wainganga Plain: Includes the Districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.

(ii) Maharashtra Plateau:

- (a) Eastern Maharashtra: Includes the Districts of Aurangabad, Jalna, Parbhani, Hingoli, Nanded, Bid, Osmanabad, Latur, Solapur, Sangli and Kolhapur.
- (b) Western Maharashtra with Protruded Hills: - Includes the Districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

- (a) Maharashtra Littoral: Includes the Districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, **Ratnagiri** and Sindhudurg.

Ratnagiri District forms a part of the Maharashtra littoral, the micro level division of Coastal Plains. District as a whole is a hilly tract. Over 85 per cent of the land surface is hilly. On the basis of local variation in relief and other characteristics, the District can be grouped into three parts. (i) The Sahyadri Hills, which is main system of hills and spreads along the eastern boundary of the District, (ii) Ratnagiri Plateau- the transverse chains of small hills which projecting towards west from the Sahyadri hills and run parallel to each other and (iii) The Ratnagiri coast.

(i) Sahyadri Hills in the District spread elongated over the parts of Mandangad, Khed, Chiplun, Sangameshwar, Lanja and Rajapur Tahsils in the north-south direction in the extreme east of the District. The hills have an elevation of over 200 metres which is more than 600 metres at the upper reaches and is characterized by having very steep slopes. The highest spot height is 1,239 metres in Khed Tahsil. It slopes towards west. In fact it is western scarp of Sahyadri. It is densely covered by forests.

(ii) The Ratnagiri plateau has an elongated north-south extent varying considerably in width through the centre of the District. It covers parts of all the Tahsils of the District. In this portion hill ranges run parallel to each other and as a result the numerous streams, which flow through the valleys, have formed a parallel drainage pattern. The height of plateau varies between 100 metres and 200 metres from mean sea level. The slopes of hills have partly eroded, yellowish red soils, which are shallow in depth, coarse in texture and poor in fertility. However in kharif season, rice, ragi, small millets, kodra, kulthi, udid etc. are grown in this area. In the valleys arecanut and coconut gardens thrive well in deep sandy loams. Cashewnut, jackfruits, kokam and world renowned Alphonso mangoes are also grown on the slope of hills, mainly in Ratnagiri and Rajapur Tahsils.

(iii) The Ratnagiri Coast is extending in a narrow strip of land running the entire length of the District covering parts of Rajapur, Ratnagiri, Guhagar, Dapoli and Mandangad Tahsils. It attains the height below 100 metres. This coast is cliffy and erosion seems to be predominant as can be seen from the number of wave cut platform and cliffs. Beaches, in general, are not well developed and are very narrow and occur only in small patches. Some patches of salty land are also found in the low lying areas. This coastal strip in Dapoli, Guhagar, Ratnagiri and Rajapur Tahsils has a deep sandy loam soils in which coconut and arecanut gardens thrive well. Rice, ragi, kulthi and other crops are grown in the kharif season.

Drainage

All the rivers in the District originate from Sahyadri ranges and flow from east to west and merge in the Arabian Sea. Vasishthi is the most important river of the District from the point of view of length as well as navigational facilities. Other rivers of some importance are Shastri, Bay, Ratnagiri,

Muchkundi, Jaitapur and Jagbudi. However, the rivers in this District one of great value from the point of view of navigation and fisheries. Parts of these rivers are tidal.

Climate

Ratnagiri, being a coastal District, the variation of temperature during the day and through the seasons is not large. Owing to the proximity of the sea, the percentage of humidity is more and the climate is generally moist and humid. Broadly, the year may be divided into three seasons, the summer season from March to May, the monsoon season from June to October and the winter season from November to February.

In the hot season, temperature rises slowly from March to May and May is the hottest month. With the onset of the monsoon, the temperature drops by three to four degrees. Day temperature during the monsoon is lower than those in the cold season. In the post-monsoon months of October and November, day temperature increases and days in October are as hot as in May. Night temperature is the lowest in January. Rajapur has the highest maximum temperature i.e., 35.5° centigrade and Chiplun has the lowest minimum temperature i.e. 17.5° centigrade. Generally the temperature of the District fluctuates between 17.5° centigrade to 35.5° centigrade. Within the District, the seasons show local variation also. Some of the areas of the coast are the most pleasant, particularly in hot months and sea breeze is enjoyable nearly throughout the day. Further inland, during the hot months both days and nights can be impressive more so in the tract at the foot of the Western Ghats. Along the coast the maximum temperature rarely goes beyond 40° centigrade.

During the monsoon, skies are heavily clouded. Winds are very strong and mainly westerly or south-westerly. The monsoon bursts over the District generally by the beginning of June and the rains continue with little intermission till about the middle of October. Rainfall is not uniform in all parts of the District. It increases rapidly from the coast towards the Western Ghats on the eastern border of the District. In and around ghats rainfall is very heavy. Practically the entire annual rainfall occurs during the months from June to October. Highest rainfall is received in the month of July. The highest annual rainfall of 4589.0 mm occurs in Rajapur Town and the lowest annual rainfall reported in Guhagar Towns as 3091.0 mm.

During the pre and post monsoon months, the District experiences very strong winds, sometimes reaching gale force particularly near the coast and heavy rain in association with cyclonic storms which develop in the Arabian Sea and move in close proximity to the coast. Thunderstorms are common in the post monsoon months and the latter part of the hot season.

Natural Economic Resources

Forestry

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself, there may be occasionally cultivated patches or grazing lands, but such area are shown under column 104 of the Village Directory as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Minerals and mining

Of all the Districts in Konkan Division, Ratnagiri District seems to be favourably placed with regard to the availability of some of the important minerals. Manganese and Iron Ores are found in the

southern part of Ratnagiri District. Limenite is found along the coast from Purangad to Malgund in Ratnagiri Tahsil.

Silica is found in Rajapur Tahsil, Bauxite is found in Mandagad and Dapoli Tahsils. Rajapur Tahsil is also blessed with deposits of silica sand and annually thousands of tons of silica sand is being dispatched to places like Mumbai, Pune, Kolhapur, Belgaum, Ichalkaranji etc. The feldspar, a minor mineral found in this District can be used in the manufacture of potteries. Other minor minerals found in the District are mica, mineral pigments such as clay, asbestos, building stones, glass, sand, copper, salt, limestone etc.

Soil and Cropping pattern

The soil of the District is generally classified into three parts i.e. (1) Laterite soil (2) Salty soil and (3) Coastal alluviums.

Laterite soil

The predominant soils in the District are laterite soils and extensive spreads of laterites are noticed throughout the District. They vary in colour from red to brownish red, owing to the preponderance of hydrated iron oxides. They are fairly well supplied with nitrogen and organic matter. Their texture is loamy. They are porous and not retentive of moisture. These soils are found in several grades, the main being rice soil and varkas soil. Both of these soils are available on the slopes of the hill and are partly eroded yellowish red and poor in fertility. Further they are shallow in depth and coarse in texture. Ragi (nagli) is the principal crop in these soils and it responds well to supplies of nitrogen and phosphate. The cultivation of groundnut has also picked up in the recent year.

The District is famous for its mango crop specially the world renowned Alphonso. Plenty of Cashew nut is grown in this area. On the mountain tops are the perennial forests, where varkas soils are rich in humus because of their being protected from erosion. They are reddish-brown in colour. Most of these soil being brought under plantations. Entire land-scape is also dotted with Coconut, Kokum, Arecanut and Jackfruit trees which thrive well in these soils and climate. Spices like pepper and other pulses are also cultivated especially in the coastal area.

Salty soil

Due to the inundation of the sea a part of the coastal soils has become salty. They are locally known as 'Khar' 'Khajan'.

Coastal alluviums

The coastal strips have deep sandy loams and in these soils coconut and arecanut gardens thrive well.

Agriculture

Most of the people of this District are engaged in agricultural activities and as per 2011 Census, 41.58 percent of the total workers are engaged as cultivators and 21.44 percent of the total workers are engaged as agricultural labourers in the District. They together constitute 63.02 percent of the total workers of the District.

Irrigation

The Concept of irrigation implies the existence of source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops rose in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Columns 113 and 114 of the Village Directory give all the agricultural land and when added together would correspond to the net area sown. Area sown more than once during the same year, if any, in the village is counted only once under this column. Columns 115 to 119 give source wise breakup of the irrigated area. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Culturable waste) and are covered under column 109.

Animal Husbandry

As per Census of livestock of 2003, the information on important number of livestock and livestock indicators are given below.

1) Total Cross bred / Indigenous Cattle	---	4,77,421
2) Total Buffaloes	---	60,220
3) Total Sheep	---	13
4) Total Goats	---	37,562
5) Total Equine	---	139
6) Total Donkey	---	N.A.
7) Other Livestock	---	42,629
8) Total Hen	---	10,52,752
9) Total Poultry	---	10,53,712

Source: Livestock Census 2003, as published in District Socio - Economic Review, 2010

In the District there are 477,421 crossbred/indigenous cattle, 60,220 buffaloes, 13 Sheep, 37,562 goats, 139 Equine. The Total poultry is 1,053,712 including 1,052,752 hens.

Fishery

Ratnagiri is one of the most important maritime Districts in Maharashtra. Therefore, marine fishery is naturally an important economic activity in the District. Fishing is done all along the coast, in the sea, generally up to 65 kms., from the coast. The important fishery centres in the District are Harnai, Dabhol, Jaigad, Ratnagiri and Jaitapur. Fishing activities are carried out during nine months from September to May.

The commercially important varieties of fish available in quantities are Bangada, Tarli, Pedva, Mushi, Shingada, Paplet, Halwa, Tuna, Surmai, Zinga, Dhoma, Ghol, Karli and Ravas etc. Besides these clam, oysters are also available along the entire coastal line, mainly in the creeks and backwaters.

A major portion of the fish caught is transported by sea to Mumbai. There is also a good local demand at Chiplun, Sangmeshwar and Lanja. About 60 per cent of the fish is sold fresh, 30 per cent salt and wet cured and about 10 per cent sun dried. The salt dried fish goes even to more distant Towns in Maharashtra and in southern States. The sun dried small fish is powdered in the local grinding mill at Ratnagiri. Oil from Shark liver is extracted at various centres. Supply of Shark fins and air bladders of fishes form an important item of trade. Prawns are also exported. With a view to improve the socio-economic condition of the fishermen and to augment the fish supply, several developmental schemes are introduced by the Fisheries Department.

Industry

Industrially, Maharashtra is one of the advanced states in the country but Ratnagiri is one of the most industrially under-developed Districts in the state. There are very few industries in the District. They are located in Ratnagiri, Chiplun and Khed Tahsils. The employment in non-agricultural sector depends mainly upon the village and cottage industries.

The industrial policy of the state is based on the decision to encourage industries in the developing and under developed areas in the District and to disperse industries from the heavily congested areas of Mumbai, Thane and Pune. In the District, there are industrial estates in Mirzole (Ratnagiri), Zadgaon (Ratnagiri), Kherdi (Chiplun) and Lote Parshuram (Khed) village. The main large scale industries located in these industrial estates are J.K. Files, Ultratech Cement, Henkel Chemicals Ltd, NOCIL, Finolex at Ranpar Golap (Ratnagiri), Gharda Chemicals Ltd., Exel Ltd., Rallys India Ltd., Vashisti Detergents Ltd., Gudlas Narolac etc. Apart from these Ship building at Bharti Shipyard is also located in this District. Medium sized industries include Lihan Chemicals, Vanaj engineering Sadvali, Standard Compositors Chiplun and Konkan Steel Ltd. Chiplun.

The most important small scale industries in the District are cashew nut processing, having a great demand in the national market, fruit preservation and Silica processing. Other registered units are oil mills, saw mills, cement products, sodium silicate, laundry soap, printing, book binding, bidi making etc., which are located in Ratnagiri and Chiplun Tahsils. By the size of employment generated, fishing is the largest occupation in the District. Powdered dry fish produced is used as a fertilizer.

Transport

It may be seen that the District had 117,197 two wheelers. There were 934 buses, 14,390 Cars and Station Wagons, 5,126 Jeeps, 585 taxies and 15,229 auto rickshaws (14,991 three seaters and 238 six seaters).

Moreover, there are 564 other modes of transport, the District also had 511 tractors and 561 trailers as means of transport. There are 8,815 Light Vehicles Permit Holders, 5,178 Heavy Vehicles Permit Holders and 14,636 Auto rickshaw Permit Holders in the District.

Trade and Commerce

The District is well known for the “Alphonso” and “Raiwal” varieties of mangoes. Mango trees are mainly grown in Ratnagiri Tahsil. The chief manufactured goods in the District are Ayurvedic medicine, bakery products, confectionary, refined oil, paper, cable, pickle, mango pulp etc., and chief exported commodities are cashewnut, rice, fish, coconut, clay pots, Alphonso mango, mango slices etc. They are mainly exported to Mumbai, Pune, Kolhapur and Belgaum. Apart from the weekly markets and fairs, Dapoli, Khed, Chiplun, Sangameshwar, Ratnagiri and Rajapur are important trade centres also.

Electricity and Power

All the 16 Towns and 1,531 (100 percent) inhabited villages are having power supply facility in District.

Gram Panchayat, its composition, jurisdiction and the role in the Development of village and its economy.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the ‘Bombay Village Panchayat Act, 1958’. The ‘Sarpanch’ and in the absence of Sarpanch, the ‘Upa-Sarpanch’ preside over every meeting of ‘Gram Sabha’. At least four meetings of the ‘Gram Sabha’ are held every year. Sarpanch and UpaSarpanch are elected from amongst the elected members of the Panchayat.

73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at village, Intermediate (Development Block) and District level.
2. The seats and the offices of the Chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Caste or Scheduled Tribe, as the case may be.
3. The elections to these Panchayat Raj Bodies to be held at the interval of every five years.
4. Powers, Authority and Responsibilities of Panchayats:-
 - (a) The preparation of plans for economic development and social justice.
 - (b) The implementation of schemes for economic development and social justice as may be entrusted to them including those in relation to the matters listed in the Eleventh Schedule.
5. An independent State Election Commission to conduct the elections.
6. Powers to impose taxes by and funds of, the Panchayats.
7. Constitution of Finance Commission by the State at the expiry of every five years term to review the financial position of the Panchayats and to make recommendation regarding distribution of State resources between the State and the Panchayat.

Constitution of Gram Panchayat

The Gram Panchayat consists of not less than seven and not more than seventeen members elected from Wards on the basis of adult franchise. They hold office for a term of five years. Among these, a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Administrative powers and duties of Panchayats

Administrative powers and duties of Panchayats are - to take care of the funds at its disposal, to take over and maintain water supply schemes through "Village Water Supply Fund", to make provision for carrying out within/outside the village any work subject to any directions made by State Government for any scheme or for any purpose sponsored by the Government, to make provision for carrying out work which is likely to promote health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village, to make provision for entertainment, public reception, contribution towards annual gathering, to encourage farmers and co-operative societies to increase and improve agricultural production etc.

Powers and duties of Panchayats in the Scheduled areas

Powers and duties of Panchayats are - to obtain from the Gram Sabha a certification of utilization of funds for the plans, programmes and projects, prospecting licence or mining lease for minor minerals, control on erection of building, to remove any obstructions and encroachments upon public streets and open sites etc.

Establishment, Budget and Accounts

The day to day work of the Panchayat is done by Secretary of Panchayat. The Chief Executive Officer of Zilla Parishad appoints the Secretary of Panchayat. His salary is paid from the District fund.

The budget of the village Panchayat is submitted to the Panchayat Samiti. It covers opening balance in the fund, estimated income, proposed expenditure and the amount to be contributed to the District Village Development Fund. The sanctioning authority of the village budget is Panchayat Samiti.

Taxation and Recovery of Claims

The taxes levied by the Panchayat are - tax on buildings and lands, betterment charge or the lands benefited from schemes or projects undertaken by Panchayat from 'Village Fund', pilgrim tax, tax on fairs, festivals and other entertainments, tax on bicycles and on vehicles drawn by animals, tax on professions, trades, callings or employments, shop keeping and hotel-keeping, general sanitary cess, general water rate, a lighting tax, fee on markets and weekly bazars, fee on car stands/tonga stands, special water tax for water supplied through pipes, fee for the supply of water from well and tank for purposes other than domestic use and for cattle, fee for temporary occupation on public street, special sanitary cess upon private latrines, fee for cleaning cess pool, fee for grazing cattle, fee on the registration of animals, lump sum contribution by factories in lieu of taxes levied by Panchayat, farming of fees on markets, collection of cess on every rupee of land revenue etc.

Financial Assistance to Panchayats

Gram Panchayat receives financial assistance from the State Government, loan by Zilla Parishad, Equalisation grant, Village Water Supply Fund and District Village Development Fund.

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Gram Panchayat can make provision for any public reception, ceremony or entertainment within the villages or make contribution towards at annual gathering or such other gathering of Panchayats in the District or the State.

It encourages farmers of the village to make use of co-operative societies in increasing and improving agricultural production. It supervises primary schools situated within the area of its jurisdiction.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and Other Backward Classes and in particular, in the removal of untouchability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samitis (C. D. Blocks) have been established in the District of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D. Blocks corresponds to the District and Tahsil boundaries except that the statutory towns are not covered by them.

The local self-bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self-bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

Zilla Parishad

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each District are—

- a) The Zilla Parishad,
- b) Panchayat Samiti,
- c) The Standing Committee,
- d) The Subjects Committees,
- e) Presiding authorities,
- f) The Chief Executive Officer and
- g) The Block Development Officer.

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of Councillors directly elected on the basis of adult franchise from electoral divisions in the District for a term of five years. The number of councillors being not more than seventy-five and not less than fifty, some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

Grants to Zilla Parishad

1. Grant of 7 percent of forest revenue to Zilla Parishad.
2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.
3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.
4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.
5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.
6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the District List as are included in the development plan of the State.
7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.

The development work of the District is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the District is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

Panchayat Samiti

Panchayat Samiti consists of members elected by direct election, its jurisdiction being the C.D. Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

Devolution of Powers and functions

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats¹.

¹ 1. Bombay Act No. III of 1959 (The Bombay Village Panchayats Act, 1958). 2) Maharashtra Act No. V of 1962 The Maharashtra Zilla Parishads and Panchayat Samitis Act, 1961 and 3) 73rd Constitutional Amendment.

Urban local bodies

The statutory urban local bodies are Cantonments, Municipalities or Municipal Corporations. The urban local bodies elect a Councillor from each of the Wards. The President of the Municipal Council or the Mayor of the Corporation and also his Deputy are elected from amongst the elected Councillors. The Chairmen of the various committees are also elected from amongst the elected Councillors. Although for day-to-day administration, the Chief Officer is responsible for a Municipal Council, he works under the administrative control of the President of Municipal Council.

Census concepts

Building:

A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc., but in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, stones (duly packed with lime or cement mortar), G.I./Metal/Asbestos sheets, Burnt bricks, Cement Bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stones, Slate, G.I./Metal/Asbestos sheets, Concrete. Such houses are treated as pucca house.

Kutcha houses

Houses, in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, unburnt bricks, bamboos, mud, reeds, thatch, plastic/polythene, loosed packed stone, etc., such houses are treated as Kutcha house.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and veranda which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office etc. and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's

household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common stair case or a common courtyard leading to a main gate, these are considered as a separate census house.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz: Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

- (a) Statutory Towns: All places with a municipality, corporation, cantonment board or notified town area committee, etc. are known as Statutory Towns.
- (b) Census Towns : All other places satisfying the following three criteria simultaneously are treated as Census Town.
 - i) A minimum population of 5,000 :
 - ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
 - iii) a density of population of at least 400 per sq. km. (1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against (b) (ii), the data relating to main workers were taken into account. In addition to the above stated towns, urban areas also constitute of O.Gs which are the parts of U.As.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, military

camps etc., may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an outgrowth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'Urban Agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted :

- (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and
- (b) The total population of an Urban Agglomeration (i.e., all the constituents put together) should not be less than 20,000 as per the 2001 Census. It varying local conditions, there were similar other combinations which have been treated as Urban Agglomerations satisfying the basic condition of contiguity.

Out Growth (OG)

The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc., and physically contiguous with the core town of the UA.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggar homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes

which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabai or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2011 in the State are given below:

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like tea, coffee, rubber, coconut and betel-nuts (areca). The worker engaged in plantation crops are recorded under "Other Workers".

Agricultural labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and

should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex -ratio

Number of females per 1000 males in a population.

Non Census Concepts

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs. / towns. Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut-off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 million and above population have been treated as Mega cities and the same criteria of population have been adopted in 2011 census.

Concepts used in VD and TD of DCHB

1. Educational Amenities : The type of different educational facilities available in the village is given in numbers. Both government and private educational facilities/institutions are considered for this purpose. If there are composites school like middle school with Primary classes or Secondary schools with Middle classes, these are included in the number of Primary and Middle school respectively. For example, if in a village, there are two Primary schools and one Middle school with Primary classes, the number of Primary schools in the village is given as three and that of Middle schools as one even though there may be only three educational institutions. Similarly, this applies so also in case of Secondary Schools. For better understandings, the distinctiveness of different types of schools is depicted hereunder.

1.1. Pre-primary (PP) : Now-a-days, the children are sent to schools at a very early stage. Lot of Pre-primary schools, private schools in particular have come up in villages and towns. These may or may not be recognised by the competent authorities. Even many Secondary schools have classes starting from Pre-primary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school etc.

1.2. Primary School (P) : Schools providing education from standard I and upward up to and inclusive of Standard IV are classified as Primary schools.

1.3. Middle School (M) : Schools providing education from standard V and upward up to and inclusive of standard VII are classified as Middle schools. A school with class I to VII is treated as two units, i.e. one Primary school and one Middle school.

1.4. Secondary School (S) : Schools providing education from standard VIII and upward up to and inclusive of Standard X are classified as Secondary schools. A composite school with I to X standard is treated as three separate units and counted separately under the categories of Primary school, Middle school and Secondary school.

1.5. Senior Secondary School (SS) : Schools and colleges that provide education for standard XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior secondary schools with standard I and upward to standard XII.

1.6. Degree college

(i) Arts/Science/Commerce : These are all educational institutions that provide post- PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of educations. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) Engineering College (E) : It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B.Tech.) or post-graduate engineering degrees like M.Tech.

(iii) Medical Colleges : These are graduate/post graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D. or equivalent in the above branches of medicine.

1.7. Management College/Institute (MI) : It offers courses like Diploma in Management, Post-Graduate Diploma in Management Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt) : An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI : It is a Vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Training offered by Industrial Training Institute (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC) : Non-vocational education centres, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification and age. These education Centres are opened to all.

1.11. Special School for Disabled : There are Government and Government recognised institutions/organisations engaged for providing education to different groups of disabled persons.

2. Medical Facilities

2.1. Hospital-Allopathic and Hospital-Alternative medicine : A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31-500 depending upon whether these are Sub-District, sub-divisional or District hospitals. If there are hospitals providing facilities under different systems of medicine such as, Allopathy, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy : The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda : Ayurveda means “Science of Life”. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements is represented in the form of Tridosha: Vat, Pitta and Cough. These ‘Tridoshas’ are physiological entities of living beings. Ayurveda developed in eight distinct specialities i.e., Internal Medicines, Paediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of Virility. Two types of treatments, Preventive and Curative are given in Ayurveda.

(c) Unani : Treatment of Unani consists of three components, viz., preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis, Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani system emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movements and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homeopathy : Treatment in Homeopathy, which is holistic in nature, focuses on an individual’s response to a specific environment. Homeopathic medicines are prepared mainly from natural

substances such as plant products, minerals and animals sources. Homeopathic medicines do not have any toxic, poisonous or side effects. Homeopathic treatment is economical as well and has a very broad public acceptance.

2.2. Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30 – bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3. Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor-observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4. Primary Health Sub-centres (PHS) : A Primary Health Sub-centres is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/tribal/desert areas. Each PHS has a sanctioned strength of one male and one female health worker.

2.5. Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counselling, delivery, immunization of children with check-up etc.

2.6. TB Clinic (TBC) : The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act a referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the District and it also functions as a specialized referral centre. The functions of Sub-District level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7. Health Centre : Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8. Dispensary : Place where patients are treated and medicines provided but with no in-patient facility, immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9. Veterinary Hospital : Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animal like cows, buffaloes etc. in rural areas.

2.10. Mobile Health Clinic : These are Mobile Vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated day to deliver the health care services. The services generally offered are OPD, Anti-natal, Post-natal, B.P. examination, X-ray, ECG, immunization and First aid etc.

2.11. Family Welfare Centre : Check-up and counselling is provided to the pregnant and the married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12. Nursing Home : A Nursing Home is a long term care facility licensed by the State that offers 24 hours room and board and health care services including basic and skilled nursing care, rehabilitation and full range of other therapies, treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13. Medicine Shop : A shop with sales drugs and medicines of any system of medicine viz., allopathic, homeopathic, Ayurveda or Unani medicines is considered as a medicine shop. Sometimes some shops and pan shops also keep ordinary medicines like Crocin, Burnol etc. These shops are not taken as medicine shop.

3. Drinking Water : The following are the main source of drinking water facility (ies) available in the village.

3.1. Tap Water-treated : This source of drinking water refers to a source of drinking water which is provided to the villages through pipes within their premises or to the villages through common taps (Public taps/community water points) by the Government departments, local bodies, Panchayats, public or private estate agencies etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2. Tap Water-un-treated : If the villages are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from untreated source'.

3.3. Covered Well (CW) : A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snow melt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animal cannot fall down the hole. It is considered as covered well.

3.4. Un-covered Well (UW) : A well which is (1) un-covered on sides from run-off water, (2) Un-covered bird droppings and animals or (3) both.

3.5. Hand pump (HP) : Hand pump means where ground water is taken out manually by operating a hand pump.

3.6. Tube Well/Borehole (TW) : Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lake are self-explanatory.

4. Community Toilet Complex : Community toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Shauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM) : It is an outlet dealing with the materials hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygienic accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use : Many of the solid wastes having economic values but put for disposal can be recycled for reused e.g., food, cow dung, leaves,

vegetables, paper, wood, plastics, old cloth etc. However some of the wastes are not recyclable. These are carbon paper, thermocol etc. When recyclable solid waste is subjected to decomposition, bio gas could be produced under favourable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or Non-Governments organisation.

7. Communication and Transport facilities :

7.1. Post Office (PO) : Self-explanatory.

7.2. Sub-Post Office (SPO) : Sub-Post office includes Extra Departmental Post Offices and those providing Franchise postal services and also part time services in lieu of some honararium. The limited postal services include sell of stamps, receipts of letters and money order and also distribution of letters.

7.3. Post & Telegram Office (PTO) : Telegraph office is setup by the Government to enable people to send or receive telegrams. If the phonograms facility is available (though the Telegraph office may not be equipped with Morse Code Transmitter), the village is considered to be having telegraph facility.

7.4. Telephones (landlines) : If the village is having the Public Call Office (PCO) either run by the Post Office or by the individuals or by a private shop, then the village is considered to be having telephone facility.

7.5. Public Call Office (PCO)/Mobile PCO : Self-explanatory.

7.6. Mobile Phone Coverage : Mobile phones are now very common particularly in Urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7. Internet Cafes/Common Service Centres (CSC) : If the village is having the facility of cyber cafes or shops own by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all Government services in an integrated manner at the door steps of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non –IT based services.

7.8. National Highway (NH) : These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH2 for easy identification.

7.9. State Highway (SH) : These are roads of a State linking District headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10. Major District Road (MDR) : These are important roads within a District, serving areas of production and markets and connecting these with each other or with the main highways.

7.11. Other District Road (ODR) : These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development headquarters or other main roads.

7.12. Village Road : The approach to village refers to the State of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather and whether it is in accessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR) : A road provided with a bituminous surfacing.

7.14. Gravel (Kuchha) Road (GR) : A road constructed using well compacted crushed rock or gravel material (Coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15. Water Bound Macadam (WBM) : These is the road layer made of crushed or broken mixer of sand and rock fragments mechanically inter locked by rolling and void field with screening and binding material with the assistance of water.

2011 Census Findings

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the Census 2011 was the 00.00 hrs, of 1st March 2011. The census provides a snapshot of the population of the country as on 1st March 2011. Actual enumeration was spread over a period of 20 days from 9th February 2011 to 28th February 2011, followed by a revisional round up to 5th March 2011 for updating of the population figures with reference to 00.00 hours of 1st March, 2011. A household schedule having 29 questions for information on every individual in the household was used in 2011 Census. These questions are mainly self-explanatory and answers are recorded in text or in codes depending on the type of information collected. Question No. 1 to 14 are related to general and socio-cultural characteristics of an individual. Question 15 to 22 are about economic activity of the person whereas Question 23 to 26 are about migration. Some information related to fertility is collected from women through Question no. 27 to 29.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously a list of villages. These lists in fact form the basic frame for the organization of the Census Operations. Thereafter, geographical area that could be covered conveniently carved out to constitute the enumerator's block.

The next major step was the house listing operation that was carried in the State during May-June 2010. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration blocks were formed on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding Computer/Laptop, Mobile phone etc., was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, Tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on Tahsils are same. And also, Sub-District in Maharashtra is known as Tahsil.

Distribution of Population in Rural-Urban Areas

According to the 2011 Census, the District has a total population of 16,15,069 comprising of 7,61,121 males and 8,53,948 females. In the total population, 1,351,346 persons constituting 83.7 percent of the total population is in rural, while 2,63,723 persons constituting 16.3 percent are in urban. The number of people living in rural areas has decreased from 15,04,568 in 2001 to 13,51,346 in 2011 and hence the percentage share of rural population has decreased from 88.7 percent to 83.7 during 2001-11. While in urban areas their number has increased from 1,92,209 in 2001 to 2,63,723 in 2011 and in terms of percentage share, it has increased from 11.3 percent in 2001 to 16.3 percent in 2011 Census.

Size class and Status of Towns:

As presented in Statement I of Town Directory, Towns are classified into six specific population size-classes according to the population recorded in decadal Censuses. The objective of such classification is to make a comprehensive analysis of various demographic parameters at lower constituent units of urban areas.

Population Growth: The District has recorded 16,15,069 persons with 7,61,121 males and 8,53,948 females. Ratnagiri recorded a decrease in population of 81,708 persons during the past decade showing a negative growth rate of 4.8 (minus) percent.

Density: The District shows a density of population of 197 per km², whereas it is 167 for rural and 2232 for urban.

Sex Ratio: The sex ratio of the District is 1122 comparatively higher than 929 compared to the State level. In rural it is 1144 and in urban 1015. Within the District the sex ratio varies from 1,253 in Guhagar Tahsil to 1,053 in Ratnagiri Tahsil.

Work Participation Rate: Percentage of workers (Main + Marginal) to total population is called as work participation rate. The District has a work participation rate of 44.21 percent which is 46.49 in rural and 32.55 percent in urban. Among males it is 53.47 percent and among females 35.96 percent. The total workers consist of 34.36 percent of main workers and 9.85 percent of marginal workers. About 55.79 of population is non-workers.

Literacy: The literacy rate of the District is 82.18 percent and area-wise it is 80.13 in rural and 92.75 in urban. Among males the literacy rate is 90.93 and for females it is 74.53 which show a gap in male-female literacy rate of 16.4 percentage points. This gap is wide as 18.31 points in rural and small as 5.25 in urban.

Religion: The collection of data on religion has been a part of Census since 1872. In the Pre-Independence Census reports, the data on religion was being presented for nine major religions namely Hindu, Muslim, Tribals, Christian, Sikh, Jain, Buddhist, Parsi, Jew and Others. However, since the Census 1951, the data on religion has been presented for six major religions namely Hindu, Muslim, Christian, Sikh, Jain and Buddhist. Besides, all the other minor religions have been classified under the category of 'Others'.

The data on religion was collected in Census, 2011 through question No. 7 of Household Schedule where names and codes of six main religions were shown to facilitate the Enumerator to record the code of the religion reported by an individual. In the case of other religions space was provided to record the actual name. In case where an individual did not specify any Religion, those were recorded as "Religion Not Stated".

As per 2011 Census, 80.9 percent of the District population are Hindus and Muslims constitute about 11.6 percent. Remaining population consists of Buddhists (7 percent), Jains (0.2 percent) and Christian (0.1 percent). The proportion of Sikhs and others are negligible.

Availability of University education in the District: There is no University available within the District but it is served by Mumbai University. Considering the need to cater academic and administrative services to the students of Konkan region, the University of Mumbai initiated an Administrative Sub-Centre at Ratnagiri on September 05, 1989. The District has one Agricultural University viz., Dr Balasaheb Sawant Konkan Krishi Vidyapeeth in Dapoli.

Mother Tongue:

As per 2001 Census, Marathi is the principal language of the District and is the mother tongue of 87.0 percent of the District population. In rural areas Marathi speakers account for 89.1 percent whereas in urban areas it is 70.6 percent. Urdu is the second largest language spoken in the District. It accounts for 7.0 percent of the total population. The proportion of Urdu speakers is higher in urban areas (15.1 percent) than the rural areas (6.0 percent). The third largest language spoken in the District

is Kannada, its percentage to the total population is 1.3 and mainly spoken in urban areas by 2.9 percent of the population, whereas it is 1.1 percent in rural areas.

Scheduled Castes and Scheduled Tribes

There are 66,948 Scheduled Caste population and 20,374 Scheduled Tribe population constituting 4.15 percent and 1.26 percent of the total population in the District. In rural there are 4.26 percent of Scheduled Caste population and 1.39 percent of Scheduled Tribe population, whereas their respective figures in urban are 3.57 percent and 0.6 percent.

Brief analysis of PCA data

Population growth

The Table-1 gives the percentage decadal variation for 2001-2011 with rural-urban breakup at District and Tahsil level. The percentages of urban population to total population for 2001-2011 are also given.

Table-1: Decadal change in population of Tahsils by residence, 2001-2011

The District rural population in Census 2011 is 13,51,346. It is spread out in 1531 inhabited villages. Out of 1531 villages 7 percent villages (108) are having population less than 200. Major portion of the District population (35 percent) lies in villages whose population size is in the range of 500-999. About 28 percent of villages fall in the population size class of 200-499 and 22 percent of villages fall in the population size class of 1000-1999, whereas 7 percent of villages fall in the population size class of 2000-4999. There are only 4 villages which are having population in the range 5000- 9999.

Changes in status of Towns in 2011

Table-3 gives information on changes in the status of Towns occurred in the District during the period 2001-11.

Table-3: New Towns, de-notified, declassified and merged Town in 2011 census

(d) Wholly merged with other Town(s)	Nil

Note : Declassified means the Census Towns of 2001 census which failed to satisfy the demographic and economic criteria.

After 2001 Census, seven villages viz., Dabhol, Gimhavane, Mouje Anjanvel, Zadgaon, Karle, Kuwarbav and Devrukh are declared as Census Towns, which were villages in 2001 Census. Guhagar Census Towns of 2001 is declassified as village in 2011 Census and Dapoli Camp (CT) received the status of Nagar Panchayat.

Sex Ratio

In Table-4 the sex-ratio of the State and the District with rural-urban break-up are given for the census years from 1901 to 2011.

Note : Sex ratio has been defined here as the number of females per 1000 males.

2011 Census, recorded a sex ratio of 1,122 females per 1000 males in the District. This is higher compared to the State average (929). The sex ratio in the District has remained higher than that of State since 1901. As regards total areas, the sex ratio at the State level declined by 49 points and at District level it increased by 3 points during the last 110 years. Similarly the sex ratio for the rural areas for State decreased by 51 points and for the District it is increased by 18 points. For the urban areas, at State level, the sex ratio increased by 41 points and for the District it has increased by 24 points during the above periods (i.e. 1901–2011).

Table-5 indicates sex ratio by Tahsils. At District level the sex ratio is 1122 which is 1144 for rural and 1015 for urban.

Within the District the sex ratio varies from 1,253 in Guhagar Tahsil to 1,053 in Ratnagiri Tahsil. The rural areas in general have a higher proportion of females than urban areas. Ratnagiri District also conforms to this pattern. In rural areas six Tahsils out of 9 Tahsils have higher sex ratio and three Tahsils have lower sex ratio than District rural average.

In urban areas, three Tahsils Ratnagiri, Khed and Sangameshwar have higher sex ratio than the District urban average (1,015). While Dapoli, Chiplun, Guhagar and Lanja Tahsils have lower sex ratio than District urban average and Rajapur Tahsil is at par with the District urban sex ratio.

Sex ratio exclusively for rural at C.D.Block level within the district are presented in Table-6. In Maharashtra State, C.D.Blocks and rural parts of Tahsils is co-terminus.

Among 9 C.D. Blocks, Guhagar has the highest sex ratio of 1,257 and the lowest sex ratio is recorded in Ratnagiri (1070). Mandangad, Dapoli, Guhagar, Sangameshwar, Lanja and Rajapur C.D. Blocks have sex ratio above the District average while Khed, Chiplun and Ratnagiri have sex ratio below the District average.

In Table-7, the villages are distributed in different ranges of sex-ratio. For each sex-ratio range, the number of villages and their percentage to total number of villages and the related rural population and their percentage to total rural population are given.

Sex ratio District (Rural) : 1144

The perusal of the Table reveals that 1,050 villages constituting 68.58 percent of the total inhabited villages covering 59.13 percent of the total District rural population are in a sex ratio range of 1100 and above, while 339 villages constituting 22.14 percent of total inhabited villages covering 28.42 percent of total District rural population are in sex ratio range of 1000–1099. There are 71 villages which fall in sex ratio range of 950-999 covering 6.99 percent of the rural population of the District. There are 63 villages forming 4.13 percent of villages covering a population of 5.12 percent fall in the range of 750-949 and the remaining 8 villages (0.52 percent) with a population of 0.34 percent come under the sex ratio range of less than 700.

Town-wise sex ratio figures for urban area are presented in Table-8. In the urban areas of different Towns, the sex ratio varies from town to town.

Sex ratio (Urban) District:			1015

Among the 16 Towns of the District, the highest sex ratio is in Karle (CT) (1,301) and lowest sex ratio is in Jalgaon (CT) (921). Dapoli Camp (NP), Khed (M.Cl), Chiplun (M.Cl), Ratnagiri (M.Cl), Zadgaon (CT), Devrukhi (CT) and Karle (CT) are with sex ratios above the District urban average and Rajapur (M Cl) is at par with District urban average while remaining Towns show sex ratio below the District urban average.

Table-9 shows, Tahsil wise rural-urban break-up of total population in 0-6 age-group by sex and the sex-ratio for child population in 0-6 age group are given. The child sex ratio in the District is 936. The rural-urban break up is 937 and 932 respectively. In urban area of the District the child sex ratio is lower as compared to the rural part of the District.

The urban child-ratio of the District is 932. In urban areas of different Towns, the sex ratio of population in the age group 0–6 varies from town to town. Ratnagiri (M.Cl) has the highest sex ratio of population in the age group of 0-6 and Gimhavane (CT) has the lowest sex ratio.

Scheduled Caste and Scheduled Tribe Population

Census provides the necessary data about the Scheduled Castes and Scheduled Tribes for evolving suitable plans for their socio-economic upliftment. Both the planners and the administrators heavily depend on this data. The total population, the total Scheduled Caste/Scheduled Tribe population and their percentage to total population are given in Table-13 with rural-urban break-up for the District and the Tahsils.

Total population of the District is 16,15,069 persons comprising 66,948 (4.15 percent) Scheduled Caste and 20,374 (1.26 percent) Scheduled Tribe population. In the rural areas Scheduled Caste population accounts for 4.26 percent and in urban areas 3.57 percent while Scheduled Tribe population accounts for 1.39 percent in rural area and 0.6 percent in urban area of the District.

The highest proportion of Scheduled Caste population is seen in Lanja Tahsil (6.56 percent) and lowest in Guhagar Tahsil (2.3 percent). The highest proportion of Scheduled Tribe population is seen in Mandangad Tahsil (5.93 percent) and lowest in 2 Tahsils i.e. Sangameshwar and Lanja (0.21 percent). As regards Scheduled Castes and Scheduled Tribes, they have higher concentration in rural area as compared to urban area.

In Table-14, the total rural population, the total rural Scheduled Caste and Scheduled Tribe population and their percentage to total rural population are given for the District and the CD Blocks.

The percentage of Scheduled Castes and Scheduled Tribes in rural areas of the District is 4.26 percent and 1.39 percent respectively. The proportion of Scheduled Caste population is above the District average in 5 C.D. Blocks i.e., Mandangad (4.69 percent), Sangameshwar (4.99 percent), Khed (5.31 percent), Ratnagiri (5.23 percent) and Lanja (6.71 percent) and below in remaining 4 C.D. Blocks. The relatively higher proportion of Scheduled Caste population is seen in Lanja C.D. block (6.71 percent) and the lowest is found in Dapoli (2.23 percent).

The proportion of Scheduled Tribe population is above the District average in 3 C.D. Blocks viz., Mandangad (5.93 percent), Dapoli (6.13 percent) and Khed C.D. Blocks (1.44 percent) and below in 6 C.D. Blocks. The highest proportion of Scheduled Tribe population is seen in Dapoli C.D. Block (6.13 percent) and lowest in Lanja C.D. Block (0.16 percent).

In Table-15, distribution of villages according to range of percentage share of Scheduled Caste population are presented. Their percentages and proportion of population covered in those villages are also shown in the Table.

Note : When the absolute figures of total populations are sizable then only these ratios appear sensible.

In urban areas sex ratio among Scheduled Caste population is 984, while among Scheduled Tribe population it is 922. The highest sex ratio among Scheduled Castes is 1135 in Lanja (CT), while the lowest is 143 in Mouje Anjanvel (CT). The highest sex ratio among Scheduled Tribes is 1,131 in Dabhol Camp (NP), while the lowest is 200 in Mouje Anjanvel (CT).

Literacy Rate

Table-20 shows the number and percentage of literates and illiterates by sex for the District and Tahsils with rural-urban breakup. In the District, the percentage of literates is 82.18 with a break-up of 80.13 percent for rural and 92.75 percent for urban. The urban literacy rate is higher than the rural literacy rate. Similarly the male literacy rate is also higher than the female literacy rate.

Work Participation Rate

Nature of one's activity and extent of participation in economically productive works are the decisive factor for such a classification. Level of economic development of different regions within the District, availability of opportunities besides willingness to work especially among women, initiative and entrepreneurship evinced by men folk in general activities are the important factors that influence the distribution of population under these three categories i.e., main workers, marginal workers and non-workers

The work participation for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. There has been no conceptual change in defining the workers between 2001 and 2011 census. In 2011 Census, there has been mainly three-fold classification of population namely main workers, marginal workers and non-workers, which was adopted for 2001 also. An addition of one sub-category in marginal workers for those worked up to 3 months only is the small change in presentation of data on marginal workers.

Table-30 shows the distribution of main workers, marginal workers and non-workers for persons, males and females in 2011 Census.

The work participation rate for workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. In the District 34.36 percent of population are recorded as main workers, 9.85 percent as marginal workers and the remaining 55.79 percent as non-workers.

Among the main workers, male work participation rate is 45.21 percent while that of females it is 24.70 percent. In case of marginal workers, male work participation rate is 8.27 percent while for female it is 11.26 percent.

The proportion of main workers is the highest (39.01 percent) in Sangameshwar Tahsil and the lowest (31.68 percent) in Ratnagiri Tahsil. Among the 9 Tahsils of the District, 4 Tahsils have the proportion above the District average (34.36 percent) i.e. Mandangad (34.61 percent), Chiplun (35.86 percent), Guhagar (36.42 percent) and Sangameshwar (39.01 percent). Among the marginal workers the proportion of female marginal workers is higher than that of males. Rajapur Tahsil (15.94 percent) shows highest percentage of marginal workers and Mandangad Tahsil (5.46 percent) shows lowest percentage. The highest percentage of non-worker is reported in Mandangad Tahsil (59.93 percent) and the lowest is in Sangameshwar Tahsil (49.76 percent).

In Table-31, the number and the percentage of total workers, main workers, marginal workers and non-workers by sex are given for the rural areas of the District.

In rural it is seen that 35.32 percent are main workers, 11.17 percent are marginal workers and the remaining 53.51 percent are non-workers. Among the main workers, male work participation rate is 44.82 percent while that of females it is 27.02 percent.

C.D.Block-wise study of these data reveals that Sangameshwar C.D. Block has recorded the highest percentage (39.71 percent) and Ratnagiri recorded lowest percentage (32.46 percent) among main workers). The percentage of male total workers and non-workers is 54.02 percent and 45.98 percent respectively. The female total workers accounts for 39.91 percent, while 60.09 percent females are non-workers. It is seen that proportion of female marginal workers is substantially higher than that of males. The proportion of marginal workers is the highest in Lanja C.D.Block (17.26 percent) and lowest in Mandangad (5.46 percent).

Table-32 shows number and percentage of main workers, marginal workers and non-workers by sex in Towns.

In urban, 29.46 percent of the population recorded as main workers, 3.09 percent recorded as marginal workers and 67.45 percent recorded as non-workers. Among main workers there is a vast difference in male-female share. The sex wise break up for main workers in urban areas shows that it is 47.09 percent for male and 12.08 percent for female. Within the Towns Nachane (CT) (34.07 percent) recorded highest percentage and Karle (CT) (17.25 percent) recorded the lowest percentage among main workers. The percentage of marginal workers is highest in Devrukh (CT) (8.91 percent) and the lowest in Dapoli Camp (NP) (1.39 percent).

Non-workers constitute 67.45 percent of the total urban population. Female non-workers constitute 85.49 percent while 49.14 percent males are non-workers.

Table-33 indicates the distribution of workers by sex in four categories of economic activity in Tahsils of the District.

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers according to the broad four fold classification, namely cultivators, agricultural labourers, household industry workers and other workers. The economy of the District is primarily agricultural which is supported by the fact that the cultivators 41.58 percent and agricultural labourers 21.44 together constitute 63.02 percent of the total workers of the District. The agricultural sector has absorbed more than three fifth of the total workers in the District. Remaining 2.41 percent are engaged in household industry and 34.56 percent are engaged as other workers.

The proportion of cultivators varies from 55.79 percent in Lanja Tahsil to 24.62 percent in Ratnagiri Tahsil. The proportion of agricultural labourers varies between 25.38 percent in Rajapur Tahsil and 18.34 percent in Guhagar Tahsil. The highest proportion of household industry workers reported in Chiplun Tahsil (3.12 percent) and lowest is in Lanja Tahsil (1.13 percent) and the proportion of other workers varies between 53.50 percent in Ratnagiri Tahsil and 18.61 percent in Lanja Tahsil.

Table-34 indicates the distribution of workers by sex in four categories of economic activity in C.D. Blocks.

The economy of the District is primarily agricultural as supported by the fact that cultivators (46.94 percent) and agricultural labourers are 23.93 percent together constitute 70.87 percent of the total main workers of the District. The agricultural sector has thus absorbed a predominant proportion of working force and only about 29.13 percent of main workers are engaged in non-agricultural activities. Out of this remaining 29.13 percent worker only 2.34 percent workers are engaged in household industry while 26.79 percent are engaged in other works.

The proportion of cultivators varies between 60.45 percent in Lanja C.D. Block and 33.24 percent in Ratnagiri. The proportion for agricultural labourers varies between 26.35 percent in Lanja C.D. Block and 18.44 percent in Guhagar.

In Table-35, the total urban population, the total workers and their four categories with their proportion to total urban workers are given by sex for the District.

In urban 'Other Workers' with 91.47 percent of total workers constitute the highest percentage of workers. The next category constituting the highest percentage of workers is Agricultural Labour (3.22 percent) followed by Household Industry workers (2.97 percent) and Cultivators (2.34 percent). Among Agricultural Labourers and Household Industry Workers, there is higher percentage of females than males.

In all the Towns, the share of Other Workers is above 70 percent. Ratnagiri (MCI) tops with the highest percentage of Other Workers (96.90 percent) and lowest is in Devrukh (CT) (70.20 percent). Agricultural Labourers constitute the second predominant category of workers in all the Towns. The proportion of agricultural labourers varies between 16.09 percent for Devrukh (CT) to 0.13 percent for Zadgaon (CT).

Brief analysis of the Village Directory and Town Directory data

The highlights of the data based on information collected for Village and Town Directory are presented in Tables 36 to 45. These are mainly related to facilities of education, medical, drinking water, transport and communication, banking, etc. The detail data are compiled for CD Blocks and Towns and a brief analysis has been made for these data for villages and towns.

Table-36 presents data on various facilities available to the villages whereas the similar data for population served by such facilities or beneficiaries are presented in Table-37. A brief note on each such facility along with a Table on appropriate data at which distance such facility is available is made separately.

Education

The educational facility is available in 1,528 villages, which constitute 99.8 percent of the 1,531 total inhabited villages of the District. In Dapoli, Khed, Chiplun, Ratnagiri, Sangameshwar, Lanja and Rajapur C.D. Blocks the educational facility is available in all the inhabited villages. This is followed by Guhagar C.D. Block with 99.17 percent and Mandangad with 98.17 percent villages with educational facility. The educational facility is available to 99.99 percent rural population in the District (Table-37).

There are only 59 villages which do not have primary schools. Out of these 59 villages, students of 43 villages have can access primary school at a distance within 5 kms., and the remaining 16 villages at a distance 5-10 kms. Similarly, there are 550 villages which do not have Middle School facility. Out of these, the students of 329 villages have this facility within 5 kms., and the remaining 221 villages at a distance 5-10 kms. (Table-38)

However, there are 1,530 villages which do not have a degree college. Out of them, the students of 135 villages have a degree college located at a distance of hardly within 5 kms. In respect of 297 the distance to be covered is between 5 and 10 kms., and in case of the remaining 1098 villages, the residents have to cover more than 10 kms. (Table-38). According to population size of the villages, there are only three villages in the population range of 1-499 which do not have education facility (Table-40).

Medical

Medical institutions of one or the other type are functioning in 652 (42.59 percent) villages out of 1,531 inhabited villages in the District covering 68.59 percent of the total rural population being served with this facility. The villages are availing this facility through Primary Health Centres, Sub-Centres, Dispensaries etc., which serve not only the resident population of concerned village but also those residing in surrounding villages (Table-36 and 37).

Distribution of villages according to the distance from the nearest statutory Town and availability of different facilities shows that, out of 652 villages, 29 villages are located within 5 Kms., 122 villages at a distance of 5-15 Kms., 426 villages at a distance 16-50 Kms., and 75 villages are at a distance of beyond 50 kms from the nearest statutory Towns (Table-39).

According to the population range, the medical facility is available in 10.19 percent of small villages in population range less than 500. The same is 25.37 percent for villages in population range of 500-999. It is cent percent only in case of villages in population range 1000 and above. (Table-40)

Drinking Water

The drinking water source is available in 1,530 villages (99.93 percent) out of 1,531 inhabited villages serving almost cent percent population of the District. All villages of the District have this facility except in one village in Mandangad C.D. Block. (Table-36 & 37)

Post Office

As regards rural areas of the District, the facility of post and telegraph is available to 679 villages (44.35 percent) serving 67.86 percent of rural population of the District. Within the District, the percentage of villages having post and telegraph facility varies from 20.18 percent in Mandangad to 64.63 percent in Chiplun C.D. Block. Similarly the percentage of population served with this facility varies from 41.66 percent in Mandangad to 79.31 percent in Chiplun C.D. Block (Table-36 and 37).

Postal facilities are not available in 852 villages. Out of these, 224 villages have this facility within a distance of 5 kms and 199 villages at a distance of 5-10 kms. People of 429 villages have to cover a distance beyond 10 kms., for availing postal facility (Table-38).

The distribution of villages according to the distance from the nearest statutory Town and availability of different facilities shows that, among 679 villages with postal facility, 24 villages are located at a distance of less than 5 Kms., 136 villages are within 5-15 Kms., 437 villages are within 16-50 Kms. and 82 villages are located at 51+ Kms. from the nearest statutory Towns (Table-39).

This facility is available in all 4 villages with population 5000 and above whereas in villages with population less than 500 out of 530 villages only 3 villages (0.57 percent) have post office. In villages with population size 500 to 4999 about 67.40 percent of them have post office facility. (Table-40).

Telephone

The facility of telephone is available in 1,358 villages (88.7 percent). These villages serve 96.14 percent of rural population of the District. Guhagar C.D. Block with 92.56 percent has the highest proportion and Khed with 83.26 percent holds the last rank. Chiplun, Guhagar, Ratnagiri, Sangmeshwar and Rajapur C.D. Blocks are having proportion of villages more than the District average (Table-36 & 37).

Telephone facility is not available in 173 villages. These 173 villages are situated at a distance of hardly within 5 Kms from the places where telephone facility is available (Table-38).

The distribution of villages according to the distance from the nearest statutory town and availability of different facilities shows that, 50 villages are located at a distance less than 5 Kms., 244 villages are located at a distance of 5–15 Kms, 883 villages at a distance of 16–50 Kms and the remaining 181 villages are located at beyond 50 Kms from the nearest statutory Towns (Table-39).

This facility is available in all villages having population 500 and above whereas in villages with population less than 500, only 357 villages (67.36 percent) are having this facility.

Transport and communication

Transport and communication include bus service, rail facility and navigable waterways. If a bus stop or railway station or navigable waterways is located within the territorial jurisdiction of a village, it is considered to have been served by such a facility even if it is located little away from the actual settlement. About 1,133 villages (74.0 percent) have communication facility serving 92.35 percent of the rural population of the District. Chiplun C.D. Block with 90.24 percent has the highest proportion whereas Mandangad with 51.38 percent holds the last rank among the 9 C.D. Blocks of the District (Table-36 & 37).

Out of 1,531 inhabited villages, 404 villages do not have bus service facility. Among these the residents of 388 villages have this facility within 5 Kms and for residents of 16 villages this can be availed at a distance 5-10 kms. (Table-38)

The distribution of villages according to the distance from the nearest statutory town and availability of different facilities shows that, 45 villages are located at less than 5 Kms., 221 villages are at 5-15 Kms., 728 villages are at 16-50 Kms., and 139 villages are located at distance of 51 Kms., and above from the nearest statutory town (Table-39).

This facility is available in all villages having population 500 and above. In case of population less than 500 only 132 villages (24.91 percent) are having this facility.

Banks

The facility of banking services is available in 108 villages (7.05 percent) serving 17.96 percent rural population of the District. The proportion of villages with banking facility varies from 9.76 percent in Chiplun C.D. Block to 4.59 percent in Mandangad C.D. Block (Table-36 & 37).

As per distribution of villages according to the distance range from nearest statutory town, the banking facility is available in 2 villages (3.7 percent) which are located at a distance less than 5 kms.,

22 villages (8.53 percent) at a distance 5-15 Kms., and 71 villages (7.09 percent) at a distance 16-50 Kms. In case of remaining 13 villages (5.96 percent) the distance is beyond 50 Kms. (Table-39)

Overall the banking facility is available in 108 (7.05 percent) villages whereas none of the village in population ranges less than 1000 has this facility. About 16.28 percent of villages in population size range 1000-1999 and 42.48 percent of villages in size range 2000-4999 have banking facility. All 4 villages with population 5000 and above have this facility.

Approach by Pucca Road

Road whether 'Pucca or Kutcha' are the nerve system of a District. They act as a pull factor for the development and upliftment of the area. Roads with cement concrete, black top, water bound macadam etc., come under pucca roads and the remaining are treated as Kutcha roads.

Pucca road facility is available to 1,500 villages (97.98 percent) out of 1,531 inhabited villages serving 99.11 percent of rural population of the District. Ratnagiri Tahsil with cent percent villages has the highest proportion, whereas Dapoli Tahsil with 96.51 percent holds last rank. The proportion of pucca road facility is above the District average in 4 C.D. Blocks (Table-36 & 37).

About 54 villages having approach by pucca road are located at a distance of less than 5 kms., from the nearest town, 254 villages are at a distance 5-15 kms., 978 villages at a distance of 16- 50 kms., and the remaining 214 villages are at a distance beyond 50 kms., from the nearest statutory Town (Table-39).

Power Supply

All the 1,531 inhabited villages (100 percent) in the District are electrified.

It may be summed up from the foregoing paragraphs that in respect of availability of different types of facilities, the larger villages have an advantage over the smaller ones. Population size and availability of facilities are directly associated with each other.

Land use pattern

Table-41 shows the land use pattern in the District, mainly how the available land has been put to different uses for cultivation.

Note:- Cultivable area= irrigated area + unirrigated area

For the District as a whole, 30.18 percent of the total area is cultivable. Among all the C.D. Blocks, Dapoli has the highest percentage of cultivable area (40.95 percent) and Khed has the lowest percentage (20.70 percent). Only 2.21 percent of the cultivable area of the District is irrigated. Guhagar C.D. Block has the highest percentage of irrigated area to cultivable area (3.94 percent) and Rajapur C.D. Blocks has the lowest (0.98 percent).

Schools and Colleges

Table-42 shows the number of Schools and colleges per 10,000 population in Towns. Lanja (CT) and Rajapur (CT) have the highest number of Primary Schools per 10,000 population.

Major social and cultural events, natural and administrative development and significant activities during the decade

Guhagar (CT) of 2001 was declassified, a new village Songiri (N.V.) was created and Jogle village merged in Dapoli Camp (NP). Seven new Census Towns viz., Gimhavane (CT), Mouje Anjanvel (CT), Dabhol (CT), Zadgaon (CT), Karle (CT), Kuwarbav (CT) and Devrukh (CT) created during the last decade

Brief description of places of religious historical or archaeological importance in villages & places of tourist interest in the towns of the District

Fairs

The concentration of fairs is heavier in the District. Most of the fairs held in the District are associated with important deities and religious festivals. So far as trade is concerned, fairs are complementary to the weekly markets. In the fairs the traders and shopkeepers set up temporary stalls. Large quantities of agricultural produce and other articles of daily use are brought for sale. The people buy necessary articles in these fairs. In this District one of the most famous fair is held at Ganapati Pule, about 50 kms., from Ratnagiri. There is a holy spring oozing from the rock. On 'Ganesh Chaturthi day' this fair is held on a large scale. Besides this the other important fairs held in the District are at Kasba (Sangameshwar Tahsil) on Mahashivaratri day, at Ratnadurga fort during Navaratra festival, at 'Shri Kshetra Parshuram, near Chiplun on Akshaytritiya day and at Adivase during Navaratra festival.

After the increase in the traveling facilities there has been tremendous increase in the number of tourists. Certain forts, a few old temples and picnic points in the District play an important role in shaping the socio-economic pattern of the District. At some places the Sahyadrian traps end abruptly to create spectacular scenery and attract many people not only from this District but from outside also. Tourists are eager to get the taste of delicious eatables of the District such as Mango, Cashew nut, Jack-fruit, Kokam during the month of May.

Ganapati Pule

'Ganapati Pule' is about 50 kms., from Ratnagiri on the west coast. It is religious as well as tourist centre. Considering the growing importance of this centre, Maharashtra Tourism Development Corporation has built a tourist home. There is a holy spring oozing from the rock nearby.

Nandi

At Guhagar, the temple of 'Shiva' built in black stone is known for its architecture. A fine image of Nandi in a squatted position is so exquisitely carved out that even from a close distance one takes it for live animal. It is also a famous tourist place.

White Beach

One of the beautiful decorations in Ratnagiri is the White Beach studded with coconut palms on its border and extending over five miles of sparkling sand from Ratnagiri Jetty to Mirya Hill. With the blue-green sea in front and the green palms behind, the scenery there is fascinating at any hour of the day which makes it a favourite spot of holiday makers.

Durgadevi Temple

Close to the north of Ratnagiri there is a temple of 'Durgadevi' situated on the high plateau, it commands the sea and gives a clear view for a long distance. Of late this site is becoming popular as a picnic spot.

Forts

Ratnagiri forts are either inland or on the coast. Coastal forts are of two classes, island and headland forts. Among island forts, the main is Suvarnadurg fort at Harnai. On the main land opposite Suvarnadurg and separated by a narrow channel are the forts of Kanakdurg and Fatehgad of little value except as outworks to Suvarnadurg. Suvarndurg, the golden fortress, with an area of eight acres on a lawn irregular island about a quarter of a mile from the shore, surrounded by very high wall, is perhaps the most striking of the Ratnagiri forts. Within the fort, there are several reservoirs and a small step well with abundant water. The fort is probably built by the Bijapur kings in the sixteenth century and in 1669 strengthened by Shivaji.

The Ratnagiri fort is a series of fortification on the high headland which forms the west and of the north arm of the Ratnagiri harbour. This fort has a total area of about 120 acres. The defences of the headland form an outer and inner fort. According to the local story this fort had been in prominence since the Bahamani kings (1343-1500). Then it was under the Bijapur officer (1500-1660), 'Shivaji' who is said to have gained possession of the fort about 1670, added or renewed the strong wall that crests the eastern ridge south to the light house point and built protecting towers on two commanding points. In the eighteenth century the citadel defences are said to have been improved by the Angres (1710-1755) and completed by the Peshvas (1755-1818).

Apart from these forts there are many forts in the District viz., Jaygad fort (Ratnagiri Tahsil), Bhairavgad fort (Chiplun Tahsil), Bhavangad fort (Sangameshwar Tahsil), Mahipatgad fort (Khed Tahsil), Rajapur and Yeshvantgad forts (Rajapur Tahsil) etc.

Major characteristics of the District – Contribution of the District in the form of any historical figure associated with the District

Ratnagiri is essentially a District of villages. In the villages people live in small tile-roofed houses, spread out in two or more hamlets, which comprise the village. Coastal villages are densely shaded by belts of coconut gardens. The village sites of the inland parts are well shaded with mango, jack fruit and tamarind trees. The people of the District belong to Brahmin, Maratha, Bhandari, Tillori, Kunbi, Nav Buddhist and Musalman communities. Christians also found scattered in the District. The people of Konkan are of nature loving. The food habits of the people of Ratnagiri have their regional peculiarities pertaining to Konkan distinguishing them from the general pattern of Maharashtra. Rice is the staple food of the District. Several special dishes are prepared from rice flour. Ramnavami, Hanuman Jayanti, Bhavani Utsav, Srikrishna Janmotsav, Shiv Jayanti, Diwali, Ganeshotsav, Shimga (Holi), Muharram, Christmas etc., are the religious festivals of the people. Shimga and Gauri Ganapati are celebrated in a grand scale. People staying in Mumbai, Pune, Kolhapur etc., visit their native places to participate in these festivals. In general, social and cultural life of the people has been quite placid during the decade. One of the major administrative changes is the re-organization of Ratnagiri District which resulted in the creation of the newly formed Sindhudurg District. In this process the District boundaries of both Ratnagiri and Kolhapur Districts have changed.

Ratnagiri District is endowed with three major economic resources viz., agricultural land, maritime fishery and an abundance of mineral deposits. The District is famous for its mango fruit. The king of fruits Alphonso, foreign exchange earner cashew-nut, prawns and various types of fruits and flowers are the major characteristics of the District. There is a rapid and dramatic increase in the area under cashew and mango. Large areas of varkas land have been brought under this plantation. In addition to this coconut, kokum, arecanut trees dot the landscape of the District.

A considerable deposit of building stone is found in the District. Huge quantity of this is used in construction activity. At many places, considerable deposits of ilmenities are found. The District has a long coast line and has a considerable fishing activity throughout the year except the monsoon. In this District fish canning industry is one of the busiest one. The industrial development has taken a forward leap thanks to the tremendous encouragement by the government agencies in the form of financial help. The cultivators also have taken benefit from these agencies to develop the horticultural crops such as mango, cashew nut, coconut etc. This has decreased the migration of the people of Konkan area to the nearby big cities.

Tourism is the sunrise industry in the District. Maharashtra Tourism Development Corporation has identified many sites suitable for development of tourism. The 'white beach' in Ratnagiri and 'Ganapati Pule' are very famous tourist centre. The Konkan railway has changed the entire tourism scenario of the District.

Contribution of the District

Ratnagiri has given many towering personalities, who fought for independence, litterateurs, social workers, artists, sportsmen etc. The main among them are Bharat Ratna Dr. Babasaheb Ambedkar, Lokamanya Bal Gangadhar Tilak who thundered, 'Independence is my birth right', freedom fighters Gopalkrishna Gokhale, Maharshi Dhondo Keshav Karve, Wrangler Paranjpe, Gandhi of Konkan Appasaheb Patwardhan, social worker Bhagojishet Keer, soft hearted writer, Sane Guruji, poet Keshavsut, former speaker of Lok Sabha Late Dadasaheb Mavalankar, Chief Minister of erstwhile Mumbai State Shri Balasaheb Kher and so on.
